Enjoy Restorative Relaxation with the SolTec Lounge

March 31, 2017

Relaxation meets wellness with the SolTec Lounge. Designed by neurologist and innovator Dan Cohen, MD, the lounge is intended to bring peace and tranquility to anyone who uses it, and is suitable for hospitals, medical facilities, spas, resorts, and even home usage.

Each SolTec lounge chair is adjustable with a footprint of 50 to 60 inches in length and 20 inches in width, and is equipped with cushioned vinyl padding, which results in the ultimate of comfort. The curved shape provides support to the user and when powered on, a built-in amplifier and transducer system delivers soothing magnetic vibrations that work in tandem with music that can be listened to via a headphone jack. SolTec is designed to deliver relaxation by melting away stress, with typical therapeutic sessions lasting 25 or 50 minutes.
