SolTec Lounge offers Restorative Relaxation

Shares f t i e c

Robb Report LUXURY NEWSWIRE

May 2, 2017

From the Robb Report Luxury Newswire

Total wellness through profound relaxation...

The new SolTec Lounge delivers a sound, magnetic and vibration therapy session that improves overall sense of well-being, level of peace & tranquility; and profoundly relaxes the entire physical body and mind. This technology is being used in spas, resorts/hotels, clubs (fitness/health), wellness centers, medical facilities and private homes.

The unique design of this lounge consists of an amplifier and transducers built into a comfortable seating platform, which uses layered music to induce synchronized sounds, vibrations and magnetic fields. It is designed to induce profound states of relaxation and stress reduction and a much fuller expression of the human energy system.

Covered by the Associated Press immediately upon launch, AP Writer Beth Harpaz wrote, "The comfy, curvy SolTec Lounge wouldn't look out of place in your living room but it's not just for casually putting your feet up. It delivers soothing magnetic vibrations while you listen to a soundtrack of chants, drums and more. Lie back with headphones and an eye pillow and the world with all its troubles fades away."

As Ms. Harpaz points out, we could all use more ways to help the troubles of the world fade away. The desire for new ways to relieve stress and boost healthy lifestyles is a fact:

An estimated 75 to 90 percent of all doctor visits are for stress-related issues.

Stress is a factor in heart disease, cancer, stroke, lower respiratory disease, and accidents.

When compared to other relaxation methods, the SolTec Lounge tends to bring about results more quickly and produce a more profound level of relaxation. SolTec is distributed globally by Jeff & Michele Kohl of Spa & Club Ideations. Jeff Kohl points out, "In our more than five decades in spa, wellness and hospitality, the SolTec Lounge is one of the most creative, exciting and effective stress-relieving tools we've seen. We call the effects achieved from a session, "Restorative Relaxation."

The technology for the SolTec Lounge was created by Dr. Dan Cohen, who is known for licensing and bringing to market the Breathe Right nasal strip. This project began in 1996 as a means to develop an easy way to induce profound levels of relaxation and meditation. It took 15 years to fully develop and refine this technology. Dr. Cohen and his team began selling the Lounge to physicians and health & wellness providers.

Additionally, SolTec was named a top 200 innovator by Transformative Technology. The TransTech 200 is the annual list of the key innovators, organizations, researchers, makers, and public policy leaders who are developing science-based research, applications, products and ideas that significantly increase mental and emotional wellbeing. There were nearly a thousand nominations from which to choose.
